

# Team Spotlight

GET TO KNOW SOME OF OUR PEOPLE

Ry Davies  
Assistant PM and QS

## What does a typical day look like for you?

A typical day for me varies, from attending different sites to review progress in line with the contract programme, reporting back to our clients on key activities and risks, and reporting on overall project cost to our clients to ensure that their budget tolerances are maintained.

## How long have you been at Henry Riley?

Four years.

## Have you been in any other roles during your time here?

I was a member of the Quality Management Systems team representing the Birmingham Office – in this role I obtained a greater understanding of internal processes and business risk management. I think it was my previous job experience which poised me for this position – six years armed forces, where process is next to godliness.

## What qualifications have you gained or courses have you done whilst being employed by Henry Riley?

Whilst at Henry Riley I have obtained a HNC in Construction with Distinction. Currently, I am in Year 2 of a BSc in Quantity Surveying and in parallel to the last two years of the degree, I will begin an APC training programme.

## What Clients are you working with at the moment?

I am currently working with Strawberry Star Developments.

## What do you enjoy most about your job?

I like the responsibility that comes when taking our clients' requirements and aspirations from inception to completion.

130

## As Henry Riley is celebrating 130 years in business this year. Is there anything you'd like to say about working for a company with such history, or a memory that will always make you fond of your time here so far?

I will always remember the time my glass pint spontaneously exploded in my hand at the Christmas Party in the 2019 – embarrassing moment, but a funny memory!

## What's your favourite thing to do when you're not at work?

It sounds quite cliché, but my favourite thing, next to hiking with my partner and our dog, is going to the gym. My partner and I are 'CrossFitters' so most of our evenings are spent covered in chalk dust and lifting weights.
